DOCUMENT RESUME

ED 071 610 HE 003 747

TITLE	Enrollment by Academic Program Fall 1968 Through Fall 1971.
INSTITUTION	State Univ. of New York, Albany. Central Staff Office of Institutional Research.
REPORT NO	SUNY-OIR-33
PUB DATE	Jul 72
NOTE	365p.
EDRS PRICE	MF-$0.65 HC-$13.16
DESCRIPTORS	*Educational Demand; *Educational Supply; Enrollment; *Enrollment Rate; *Enrollment Trends; *Higher Education

ABSTRACT

As the State University of New York has become more complex in response to the educational needs of its constituency, it has developed curricular offerings of a widely expanded scope and variety. This document has as its purpose to show enrollment in academic programs at each of the campuses for fall 1968 through fall 1971. The report is in two parts, each arranged by level of award. Part One shows the enrollment of campuses and the programs they offer. Part Two shows the enrollment in programs system-wide as well as the campuses at which they are offered. (Author/HS)

Academic Program Information System-Enrollment Trend Report

As the State University of New York has become more complex in response to the educational needs of its constituency, it has developed curricular offerings of a widely expanded scope and variety. This document is one of the series of our reports of the Academic Program Information System. Its purpose is to show enrollment in academic programs at each of the campuses for Fall 1968 through Fall 1971, and is the first edition of this report. The report is in two parts both arranged by level of award. Part One shows the enrollment of campuses in the programs they offer. Part Two shows the enrollment in programs system-wide as well as the campuses at which they are offered.

Some historical information about this system is in order before we proceed with a more detailed description of this report.

The original academic program inventory had its origins in the 1967 Master Plan Process which began in the Fall of 1966. At that time, the campuses were asked to list the formal academic programs they offered. This list was taken to the appropriate central staff offices responsible for program approval, and the program listings resulting from this review were organized into a taxonomy of some nineteen fields or disciplines so that the programs could be aggregated across campuses as well as listed for the campuses individually. These listings were then transferred to machine processable records so that they could be sorted in various ways to produce campus-specific lists which our office uses as a basic dimension in our annual degrees-granted and enrollment by program data collection schedules.

The academic program inventory is updated on the basis of program approval and registration correspondence among the offices of the State University and the State Education Department. Additions are also made from input received from the campuses on our data collection schedules after these additions are reviewed by the appropriate central staff office.

This report was prepared using our Fall 1971 academic program inventory as a base and adding to it any programs for the years 1968 through 1971 for which enrollments were reported. If these programs were not known to be fully approved, they were so footnoted. Programs which were dropped or which are not active will show enrollments in the earlier years only. Very new programs or inactive programs will show no enrollments. Recently begun programs will show enrollments only in the later years. Programs whose names have been changed will show enrollment under the appropriate name for the given year.

In general the enrollments are shown as they were reported to us by the campuses. In some cases this has meant a loss of specificity with respect to options in a curriculum if this breakdown of enrollment was not available. In these cases it is shown aggregated within the appropriate curriculum.

Given an inventory and enrollment report of this magnitude, there are inevitable omissions and errors which we will continue to correct in subsequent editions as they are brought to our attention.

We welcome all suggestions and comments for the improvement of the accuracy and scope of coverage in this report.

Tommy Annas
Director
